By **M. Randolph Nelson**, CNN Story Writer

SAN ANTONIO (CNN) – Using modern day technology and powerful supercomputers from the United States and Japan, the “Number of the Beast”, 666, has been recalculated using old data derived from the Bible and Book of Revelations.

Revelation 13:16-18 states, “Also it causes all, both small and great, both rich and poor, both free and slave, to be marked on the right hand or the forehead, so that no one can buy or sell who does not have the mark, that is, the name of the beast or the number of his name. This calls for wisdom: let anyone with the understanding calculate the number of the beast, for it is the number of a person. Its number is six hundred and sixty-six.”

Throughout history, interpretations involved mathematics, historical people, or events to decipher the number. English translations usually give the number as 666. But new calculations using data collected from the Bible and entered into the world’s two largest supercomputers have recalculated the “Number of the Beast”. The new corrected number, **627.13**, is sure to start a new furor over the true meaning and significance of this biblical reference.
